Sales

Sourced to Suit

We don't take one-size-fits all approach to product supply. We listen to your organisational needs and objectives to find a solution that achieves the right 'look and feel' for you.

The LED Benefit

Low energy consumption

Modern, energy efficient lamps use far less energy

Long-lasting lamps

No expense or man-hours wasted replacing dead lamps

No heat emitted

No need for extra comfort cooling

Good light quality

Comfortable colour rendition with natural qualities that highlight the aesthetics of your products

No outages

No dark areas that compromise health and safety and operations.

Fast paybacks

Investment in energy savings technology can yield significant savings.

The Perfect Process

- 1** Our professional engineers visit site to survey the existing lighting systems.
- 2** Our experienced lighting designers source replacement products that meet your organisational requirements. Where possible, we will source replacements that are compatible with the existing housing to keep unnecessary installation costs down. A detailed proposal will break down your existing and proposed technologies, any financial savings achievable and the grants available.
- 3** We work with specialist financiers offering excellent rates on energy efficient assets to help protect your business working capital. The Greenlite team will also help secure available energy efficiency funding, so far 100% of our applicants have been successful.
- 4** Our qualified in-house engineering team will install the new technologies at the agreed time, making limited disruption to business activities. A risk assessment and method statement is carried out before work commences to ensure the health and safety of everyone on site.

We don't stop there.

When you purchase our supply and fit solution, we back up your upgrade solution with 5 year comprehensive maintenance warranties.

No strings attached maintenance.

If the lights go out, just drop us a line. We keep bonded stock in our warehouse so warranted items can be delivered to site next day with an engineer attending site within 5 days.

The Greenlite Experience

At Greenlite Group, we strive to be even better than our customers expect us to be. This is our overriding ethos.

The Greenlite Experience is a pledge to provide only the very best in customer service. It represents a commitment between our staff and our management to always be honest, respectful and trustworthy. A values-driven culture helps us to flourish in our everyday business.

We promise our customers:

- Our engineers never leave site without a signature of approval
- A dedicated account manager that's easily contactable.
- Senior level management that's always available
- Experienced staff that are qualified for the job
- Health and Safety is prioritised ensuring compliance with industry guidelines
- Limited disruption during installation
- All staff wear branded uniforms and carry ID cards
- Voice-mail messages will be attended to in a timely manner.
- Any feedback, comments or complaints will receive a transparent response and clear escalation process by senior level management.

You're in Good Hands

Our customers say we set the bar very high in the industry in terms of first class customer service and flexible approach.

We're glad they're happy. We're sure you will be too.
